

Basic features

- EDI booking IFTMIN and IFTMBF
- Booking by email
- Notification by email to Customer with a customizable Track and Trace link
- All data is searchable
- Shut down add on by time or manually
- Package add-on – print label if necessary
- Departure management - write shipping documents linked to loaded truck
- Bulk split management / hub with distribution list. Book carrier for bulk transport separated from spreading
- Some functionality can be run on mobile devices such as a phone or tablet - limited by space shortage in small devices
- Returns - Print that is packed with the goods, reverse address
- The programs and document design can be tailored in no time
- Adding customized functionality is also done in no time
- Can be linked directly to other databases and provide ERP and WMS systems data in real time
- Built-in document management so you can store any documents digitally connected to your shipment. These can then be sent along with the notification
- Build custom-designed documents such as waybills and packing lists. Link these to print of shipping documents
- Automatic updates from our central server (system, fuel surcharge, product range, conveyors, new carriers, etc.) - You can run this manually if you wish
- Easy for us to set up a test environment that you can test with in parallel
- Readback file to ERP system with shipping number and “prices” if available

Add-ons

Schipt Contract

Digitize your shipping agreements on your own and get automatic pricing and choice of carrier directly in your ERP. Of course, it also works against the shipment itself in Schipt TA.

Isn't it good to get the correct calculated price when you write the order, or when you finished picking the order in your WMS or ERP system? In addition, it helps you to choose the best option for each individual shipment. You are in control that the digital agreement matches the written!

Fixed cost and infinite number of contracts can be added!

Libello Invoice Control

Digital invoice match down to the final fee. Best in class when it comes to digital invoice control!

Schipt TMS

Plans your transports, not only for departures and departures joint deliveries but also against production and WMS. When you really want to save money and minimize unnecessary costs.

Schipt TA T/R - Retursändning e-mail

Version of e-mail regarding return shipments with reservation for return as a link in the e-mail. Including documents like attached PDF files. The link triggers the reservation and you receive an email confirming that the booking has been completed.

Can be set to send automatically with goods that is always returned or manually if you need to send return documents to a customer.

The web shops dream for returns!
